

IVF Gen®- Vitrification Straws

Product Details:

- Manufactured using polymer with high thermal conductivity, good hydrophilicity and flexibility.
- Circular groove at both ends for easy handling of the straw.
- Two labeling section designs for either directly writing on the straw or using a printed Label.
- Each model is color-coded with five colors for easy identification.
- The cap can be tightly sealed. Therefore, the straws can be used as both open and close systems.
- Curved embryo carrying section design which prevent embryo/oocyte loss.
- Minimized overall straw diameter saves significant storage space. Six straws can be stored in one vial.
- Mouse embryo assay $\geq 80\%$. Bacterial endotoxin level less than 0.5 EU per straw.

Models and Specification

There are two models. Each model is color-coded by five colors- Green, Purple, Yellow, Orange and Blue

Product Codes	Straw Cap	Straw Handler	Length
GEN CY05	Cylinder	Cylinder	130mm
GEN SCY05	Cylinder	Square Cylinder	130mm
